Environmental Services

Celebrating over 20 years of Making the Environment Better

Background

BEC has a wide range of experience in providing sustainable environmental solutions through technical support, community engagement, and program management. Our multi-disciplinary team includes degreed professionals in various fields, including: biology, business administration, environmental science, geology, political science, public safety, and systems management. We provide direct technical support through data collection, research, and report preparation; facilitate public engagement through education and outreach; and provide oversight or management of environmental projects and programs.
